TS-324 Panel - 24" coverage

Bernard T. Reed
President / CEO

In 1998, Bernard "Bernie" Reed founded Reed's Metals in a 200-square-foot portable shed in Lawrence County, Miss. but that was not the start of his humble beginnings. As a young child, Reed lived out of a traveling school bus that migrated to a new state every six months, but these challenges soon became the fuel to his hunger to create stability and a better life for himself. Although his roots started with fishing in his hometown of Horseshoe Beach, Fla. to planting trees across the south, he decided to raise his family in Monticello, Miss.

Reed, now a multi-million-dollar metal provider to residential, commercial and industrial customers, is founder or partner to 8 Reed's Metals locations that stretches across five states within the U.S., including Southeastern Mississippi, Florida, Louisiana, Tennessee, Arkansas, Texas and Missouri. Headquartered on a 20-acre site in Brookhaven, MS, Reed's Metals is a proud provider of metal roofing, pre-engineered steel buildings, and **now providing quality self-storage solutions nationwide.**

Climate-Controlled

- Interior Retrofit Systems
- Flush Hallway Systems Available
- Recessed Entries
- A/C Closets

Flush Hallway System

14ga Galvanized Stamped Base Clip
with Concrete Screw Bolt Standard
