Delivery & **Unloading**

Sure, most companies offer delivery, but did you know that most do not unload their products? Leaving customers to spend more money to rent equipment and spend their own time and resources just to get the products they've already paid for? At Reed's Metals, we have dedicated team members that put quality and service first.

Our fleet of delivery trucks are equipped to unload your products quickly and carefully according to your specifications. And because a trusted Reed's Metals team member is handling all of your products, you can be assured that they are handled with care.

Your dream home
is only a few steps away!

If the idea of designing, ordering, and installing a new house seems too complicated, don't worry. Our friendly, knowledgeable team is here to help. We will walk you through each step of the process and give you the best advice to ensure that the final product is exactly what you want. Customer satisfaction is our number one priority.

A metal building home is a great choice for a variety of reasons. First, the structure of your home will be durable. Whether you choose a rigid frame building or a pole barn for the shell of your home, you can be certain that both structures will withstand time. Secondly, a metal building home allows you to design your floor plan with freedom. You can have the open-concept home you've always wanted because a metal building home is clear-span. This means, you don't have to worry about load-bearing walls and bulky columns limiting your floor plan. And finally, a metal building home looks amazing! The design possibilities are endless. You can completely cusotmize the inside and outside of your home because a metal building doesn't limit you.

How does this work?

Reed's Metals takes your floor plan and designs the shell of your building around that. You are completely free to design your floor plan without restrictions, but square/rectangular homes result in maximum cost savings. We provide the shell of the building and the interior is up to the customer. The shell includes the building's frame, metal roofing, metal walls, trim, accessories, and any add-ons that you may choose such as insulation or wainscoting.

Delivery & **Unloading**

Customer **Service**

Our pole barns are our most versatile and budget-friendly building option. Whether you need storage for equipment or you're caught up in the barndominium craze, Reed's Metals can meet your needs.

Pole barns are designed and built completely custom to the customer's requests. We manufacture our own engineered steel trusses in-house, so you know the quality is unmatched. The steel trusses are set on top of 6x6 treated posts and the customer can choose either 2x6 lumber or metal purlins and girts. Pole barn kits also offer insulation, foam closures, wainscot, cupolas, longlife screws, and more. And our pole barns can be designed with lean-to's and roof extensions for maximum customization.

Benefits & **Features**

- Engineered Steel Trusses
- Trim Package
- Through Bolts & 5/8" Connection Bolts
- Treated 6x6 Posts set in Concrete, 8x8 Available
- Customizable Insulation Package Available
- 2x6 or Metal Purlins & Girts
- RES & PBR Profiles Available
- Welded Clips for Bolt Together Assembly
- Designed for Concrete Sheet Notch
- Erection Drawings
- No Hidden Fees - Quotes includes tax, delivery, etc.
- Delivered within 2 weeks
- Project Scheduler Available
- We Unload! - $1,000 Savings Value

Why Metal Roofing?

Durability

The average life of a non-metal roof is 17 years. Asphalt can require re-roofing every 10-15 years. A metal roofing system offers unmatched durability, lasting 2-3 times longer. Installed and maintained properly, a metal roof can last a lifetime.

Cost

Metal roofing costs are comparable to high quality shingle costs. However, the lifespan and warranty of the metal roof make it a better value. Consider the energy savings and cost to the environment as well. Metal roofing also reflects heat better than other roof products, helping to save energy and lower your energy costs.

Durability

Protect your property from high winds, hail, snow, and burning embers. Metal roofing is non-combustible and considered a class A fire rated roof when installed in new construction or when the existing roof is torn off.

Many insurance providers offer discounts for installing a metal roof. Ask yours today!

Metal vs. Shingle

- Metal roofing plus installation can sometimes be 30% more expensive than installing shingles.
- Shingles must be replaced every 10-15 years.
- Your metal roof comes with an up-to 45-year written paint warranty.
- The metal itself will last even longer!

Over time, a metal roof saves you money compared to shingles!

Have you ever heard of UL ratings?
UL Listing means that UL has tested representative samples of a product and determined that the product meets specific, defined requirements. These requirements are often based on UL's published and nationally recognized Standards for Safety.

The Reed's Metals residential profile is UL rated!
UL 580 - Uplift Resistance
UL 2218 & 790 - Fire & Impact Resistance

Residential & Commercial
