

REED'S METALS, INC.

Building Catalog

RESIDENTIAL & COMMERCIAL METAL BUILDINGS

Customer service is our **top priority!**

We proudly buy our products from Reed's Metals because they offer top-quality metal roofing components and accessories that can be ordered and **picked up same day**. That's a nice advantage we love. It feels like home at Reed's Metals.

-Matthew Livings

I use Reed's Metals because of their fast response when I need a product. **Their professionalism far exceeds any other company in their industry.**

- Adam Strength

I would recommend Reed's Metals to anyone in need of a great **customer service and friendly atmosphere**. And you can get what you need when you need it!

- Bryan Mathis

In 1998, Bernard "Bernie" Reed founded Reed's Metals in a 200-square-foot portable shed in Lawrence County, MS, but that was not the start of his humble beginnings. As a young child, Reed lived out of a traveling school bus that migrated to a new state every six months, but these challenges soon became the fuel to his hunger to create stability and a better life for himself. Although his roots started with fishing in his hometown of Horseshoe Beach, FL, to planting trees across the south, he decided to raise his family in Monticello, MS.

Reed, now a multi-million-dollar metal provider to residential, commercial, and industrial customers, is founder or partner to 8 Reed's Metals locations that stretch across 7 states within the U.S., including Mississippi, Florida, Louisiana, Tennessee, Arkansas, Texas, and Missouri. Headquartered on a 20-acre site in Brookhaven, MS, Reed's Metals is a proud provider of metal roofing, pre-engineered steel buildings, and quality self-storage solutions nationwide.

What does this certification mean for you?

Reed's Metals can now manufacture any building that requires the IAS AC472 certification. This certification is the international standard building code. In order to obtain this certification, Reed's Metals put traceability and manufacturing processes in place.

Every pre-engineered steel building manufactured by Reed's Metals accredited locations is IAS-AC472 certified, so all of our customers can be 100% certain they are getting the best quality possible.

Look for "472"

Some may claim to be IAS accredited, but only the 472 code is the top accreditation.

Reed's Metals is IAS AC472, Florida Building Code, Keystone Quality and UL Certified.

When you have a job that requires rigorous standards, you can count on Reed's Metals. Through product testing and investigation of processes and of quality control, Reed's has achieved the highest level of metal building certification - IAS AC472, which is the internationally recognized standard.

The AC472 label means that your metal building system meets rigorous standard in:

- Structural - welding and traceability for structural fabrication
- Cold Formed - products that do not require welding (purlins)
- Design - detailing and engineering

To meet building codes, the metal roof covering standards are determined by the 2012 International Residential Code. Under this code the substrate of painted metal panels must meet ASTM A755 Standard, which is AZ-50 or thicker. Reed's roofing products and procedures were proven, as well, for Keystone Quality Assurance Program and Florida Building Code product approval.

Look for that UL label. Most insurance companies offer discounts for UL approved products. Reed's Metals has UL rated products for UL790 Fire Resistance, Class 4 Impact Resistance, and Class 60/Class 90 Uplift Resistance.

**Superior Substrate.** What does that mean for you?

Some metal roofing companies have chosen to use inferior substrate to stay viable in this competitive market. Make sure you are getting the best metal for your project. Regardless of the paint system used, the paint offers little corrosion or rust resistance itself. It merely retards the loss of the aluminumzinc alloy coating. The rust resistance of metal roofing comes primarily from the alloy coating, called the substrate. The flexibility and strength come from the thickness and hardness of the steel core.

Galvalume - AZ-55 Substrate
Painted - AZ-50 Substrate

Made to Last!

We are the Manufacturer!

Primary Framing

- Pull through beam line produces straight or tapered beams
- Beams made in custom widths and lengths
- Beams manufactured into custom building frames for each job
- Frames are made according to your design & local building codes
- We provide fast estimates
- Anchor bolt foundation plans
- Erection drawings
- Most buildings delivered in 6 weeks or less

Secondary Framing

- Corporate facility in Brookhaven, MS, has two purlin mills
- Components including Cees, Zees, Receiver Channel and Eave Struts
- Made in custom lengths to reduce field cutting
- Available in industry-standard punch patterns or custom punched
- 12, 14 or 16 gauge material
- Available in red oxide, galvanized, white, and butler gray

Metal Trusses

- Available up to 50' clear span
- Set up to 12' on center
- Bolt-together two-piece design
- Pre-welded purlin clips
- Pre-drilled holes for post bolts

Residential Metal Buildings

Buy Direct, and Save!

Our engineered metal buildings are perfect for a variety of applications. We design each building individually to meet the customer's needs. Our designers take the customer's zip code, along with the design requests, and we use the latest technology to design your dream building that meets all of your local building requirements.

A metal building from Reed's Metals is completely customizable and quotes are always free. With endless options, your perfect building can finally become a reality. Our metal building kits come with a complete set of erection drawings so installation is quick, easy, and safe. Each part is factory labeled for the installer's convenience and to ensure accuracy. Building kits include roof, wall, fasteners, steel frame, structural bolts, insulation, and accessories.

If the idea of designing, ordering, and installing your metal building seems too complicated, don't worry. Our friendly, knowledgeable team is here to help. We will walk you through each step of the process and give you the best advice to ensure that the final product is exactly what you want. Customer satisfaction is our number one priority.

Whether you're in need of a home, shop, or building for your business, a Reed's Metals metal building is the right choice.

Metal Building Features

- 24 or 26 Gauge Roof & Walls
- ULT Longlife Roof Screws - Standard
- Engineered by Location
- Rigid Frames, 8", 10", or 12" Purlins
- Customizable Insulation Package Available
- Up to 45-Year Written Paint Warranty
- PBR Panels - Standard on Roof & Walls
- Standing-Seam Roofing Available
- Welded Clips for Bolt Together Assembly
- Designed for Concrete Sheet Notch
- Engineered Erection Drawings
- No Hidden Fees - Quotes includes tax, delivery, etc.
- Delivered in 4 Weeks
- Project Scheduler Available
- We Unload! - \$1,000 Savings Value

Residential & Agricultural Buildings

JX-95

TU-46

JX-100

Our pole barns are our most versatile and budget-friendly building option. Whether you need storage for equipment or you're caught up in the barndominium craze, Reed's Metals can meet your needs.

Pole barns are designed and built completely custom to the customer's requests. We manufacture our own engineered steel trusses in-house, so you know the quality is unmatched. The steel trusses are set on top of 6x6 treated posts and the customer can choose either 2x6 lumber or metal purlins and girts. Pole barn kits also offer insulation, foam closures, wainscot, cupolas, longlife screws, and more. And our pole barns can be designed with lean-to's and roof extensions for maximum customization.

Let Reed's Metals do all of the work. We'll custom design, build, deliver, and unload your pole barn in just 10 days. We even offer Project Scheduler services to help schedule your installation.

Pole Barn Features

- Engineered Steel Trusses
- Trim Package
- Through Bolts & 5/8" Connection Bolts
- Treated 6x6 Posts set in Concrete, 8x8 Available
- Customizable Insulation Package Available
- 2x6 or Metal Purlins & Girts
- RES & PBR Profiles Available
- Welded Clips for Bolt Together Assembly
- Designed for Concrete Sheet Notch
- Erection Drawings
- No Hidden Fees - Quotes includes tax, delivery, etc.
- Delivered within 2 weeks
- Project Scheduler Available
- We Unload! - \$1,000 Savings Value

Post Frame Workshops

- Up to 40 ft wide x any length standard - 50 ft and 60 ft widths available
- 29-ga standard & 26-ga available
- #2 grade southern yellow pine standard - treated available
- 4/12 pre-engineered factory-built trusses - other pitches available
- 2x6 wall girts
- 2x4 roof purlins standard - 2x6 available
- Fully trimmed with rat guard and fascia standard
- One 10x8 commercial roll-up door and one 36" steel walk-through door standard - other sizes available
- Truss spacing on 5 ft centers and post spacing on 10 ft center standard
- Trusses engineered for snow load in your area

Galv-econ Buildings

Take advantage of our fast econo-buildings. These kits are designed for easy install with roll-up and walk doors included. These select sizes are priced to sell! Don't miss out on this great opportunity to have your building in only 2-3 weeks.

Rigid Frame Buildings

Commercial & Industrial

Reed's Metals is the leading manufacturer of pre-engineered steel buildings in the Southeast. Our industrial buildings are custom designed to meet all of your needs. Commercial and wholesale accounts are offered contract pricing.

- Engineered plans designed to meet local codes
- Clearspan Buildings
- Delivery and unloading services
- Factory-Direct Pricing
- EPA Energy Star Rated Coating
- Up to 45-year written warranty
- UL Rated for uplift, impact, and fire resistance
- Siliconized Polyester & Trinar paint systems available
- Factory-marked parts for easy installation

Straight Columns

Tapered Frames

Metal Building Homes

If the idea of designing, ordering, and installing a new house seems too complicated, don't worry. Our friendly, knowledgeable team is here to help. We will walk you through each step of the process and give you the best advice to ensure that the final product is exactly what you want. Customer satisfaction is our number one priority.

How does this work?

Reed's Metals takes your floor plan and designs the shell of your building around that. You are completely free to design your floor plan without restrictions, but square/rectangular homes result in maximum cost savings. We provide the shell of the building and the interior is up to the customer. The shell includes the building's frame, metal roofing, metal walls, trim, accessories, and any add-ons that you may choose such as insulation or wainscoting.

A metal building home is a great choice for a variety of reasons. First, the structure of your home will be durable. Whether you choose a rigid frame building or a pole barn for the shell of your home, you can be certain that both structures will withstand time. Second, a metal building home allows you to design your floor plan with freedom. You can have the open-concept home you've always wanted because a metal building home will be clear-span. This means, you don't have to worry about load-bearing walls and bulky columns limiting your floor plan. And finally, a metal building home looks amazing! The design possibilities are endless. You can completely customize the inside and outside of your home because a metal building doesn't limit you.

You've waited your whole life to build your dream home. There's no better time than now and there's no better choice than Reed's Metals.

Your friend in self-storage manufacturing

- In-house Engineering & Drafting Services
- 2-4 Week Delivery (depending on complexity)
- Unloading Services (depending on location)
- "M" Panel Available
- Layout & Design Assistance Available
- Climate Control, Boat & RV and Open Canopy Units
- Commercial & Self-Storage Roll-Up Doors in Assorted Colors
- Insulation Packages to meet "R" Factor Needs
- Dr!pStop Factory-Applied Moisture Barrier
- Over 20 Colors to choose from
- Galvanized Components at all Concrete Points of Contact

Carports & Tubing

We stock all of the items needed to assemble any carport, awning, or backyard project. These tube-style buildings are assembled using galvanized posts and galvanized purlins and girts. Let us help you design a kit today!

State-of-the-art Manufacturing Process

DIY it! Put your project together using components.

If you're looking for a weekend project, or if you just like to take matters into your own hands, you can buy building parts at Reed's Metals and assemble your own style building. We offer metal trusses, treated 6x6 posts, a variety of lumber, tubing, purlins, and more components so that you can DIY your own structure.
