

REED'S METALS, INC.

Commercial Catalog

COMMERCIAL METAL ROOFING & PRE-ENGINEERED METAL BUILDINGS

Straight Columns

Tapered Frames

What does this certification mean for you?

Reed's Metals Reed's Metals is now accredited to manufacture any building that requires the International Standard Building Code IAS AC472 certification. This criteria covers inspections of metal building system elements which aid in designing, building, and specifying metal building systems.

Each pre-engineered steel building manufactured by a Reed's Metals' accredited location is IAS-AC472 certified, ensuring every customer receives product quality excellence.

Look for "472"

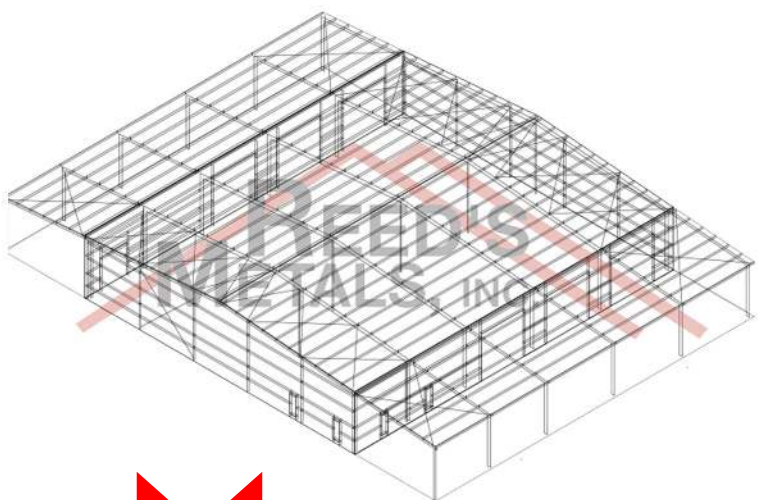

Reed's Metals is AC472 accredited. This is the highest level of IAS accreditation.

We are the
manufacturer

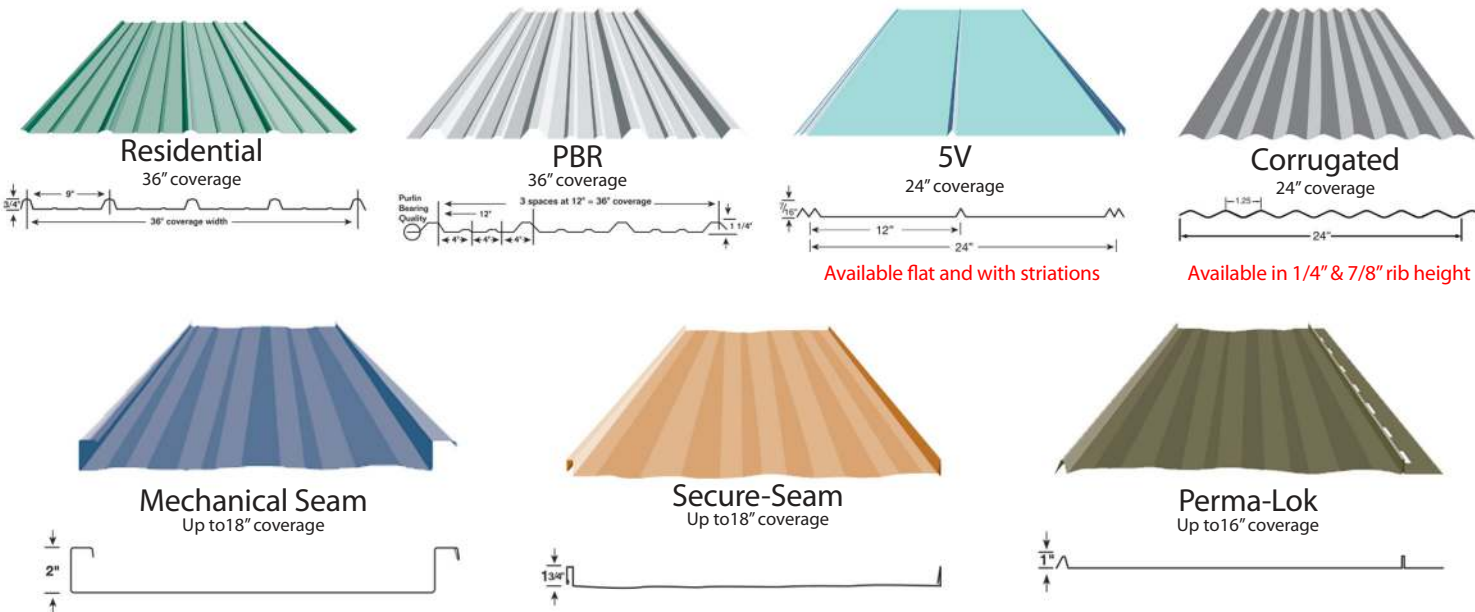

Metal Roofing

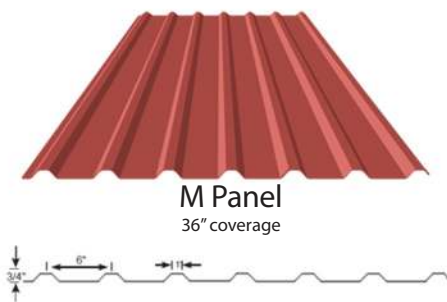

Reed's stocks coils in more than 20 colors, providing short lead times to our customers. We offer PVDF coatings on heavier guage panels in standing seam and PBR profiles. Same-day pick-up on Residential and PBR profiles is available at all Reed's manufacturing locations. Standing seam profiles can be crated and delivered or produced on-site.

Most importantly – Reed's proudly utilizes US steel in AZ50 and AZ55 substrates, coated with AkzoNobel's industry leading paint systems, to ensure our customers meet all local and state building codes.

Spotlight: M-Panel & TS-324 Panel
